

Start-ups, Dreams, Venture Capital, Acquisitions and Big Companies

A SEMINAR BY **JAY STEELE** 2013 J.W. GRAHAM MEDALLIST

JAY STEELE, BMath 1996

The dream of many adventure-seeking new graduates is to break out into the world, start a company and sell it for millions of dollars.

In this talk, I'll provide an open and honest account of my own journey down that path: starting from the wide-eyed, naive new graduate from the University of Waterloo, through selling two software start-ups to Research in Motion (BlackBerry), and the many successes and failures along the way.

Thursday, June 13th

Davis Centre 1302

2 pm

Reception to follow!

Limited seating. Register at:

mathalumni@uwaterloo.ca

Everyone welcome!
